

## Brief Constructed Response

Daniel and his friends ate pizza for lunch and dinner. At lunch they ate  $1\frac{3}{8}$  pizzas. At dinner they ate  $2\frac{1}{8}$  pizzas.

Part A

How many pizzas did Daniel and his friends eat all together?

Part B

Use what you know about adding mixed numbers to explain why your answer is correct. Use words, numbers, and/or pictures in your explanation.
