

Problem Solving Template  
(BCR Items)

Keith needs to put these fractions in order from least to greatest:

$$\frac{3}{10} \quad \frac{8}{10} \quad \frac{6}{10}$$

Part A

Put the fractions in order from least to greatest.

Part B

Use what you know about comparing fractions to explain why your answer is correct. Use words, numbers, and/or pictures in your explanation.
